

Portable TV Meter with 7-inch touchscreen display for reliable band scanning with real-time measurements

Portable TV Meter with touchscreen

- A unique addition to our products catalogue - the Portable TV Meter is both something entirely new, yet similar to what we do best - measurement equipment! A portable TV measurement device with a 7" touchscreen display.

And what does it do?

- Measure TV networks of course! It supports all the preferred modulations - DVB-C/T/T2/S/S2/ATV/QAM-B(North/South America cable standard). But our penguin is so smart, it can even measure IPTV, it can scan and check your Internet speed and it has an Optical power meter, too!

But how long can it operate?

- Equipped with a Lithium ion battery (Li-ion), the Portable TV Meter battery life can last up to 6 hours in its working mode.

Very interesting. What situations can it be used in?

- Real-time measurement of broadcast and network services
- It can be taken wherever needed and is ideal for technicians who perform measurements on site – for example, during new installations or maintenance and repair work on components of TV networks and transmitters.

FEATURES

- Portable TV networks monitoring – DVB-C, DVB-T/T2, DVB-S/S2 and Analog TV Broadcasts
- IPTV networks monitoring
- MPEG Monitoring – PAT, PMT, SDT, NIT, TOT, TDT, CAT
- 7" LCD touchscreen display, 800 x 480 resolution
